

## GEOGRAPHY

### Key Stage 3

We believe the aim of the Humanities department is to engage students by learning about exciting topics that teach students about the importance of people in the past and of people today and to understand that the world that we live in, has been shaped by millions of years of change.

The aim of studying Geography is to give students an understanding of the nature of the earth's surface, the character of places within the world and how human beings interact with their environment. Students will study enquiries on small, regional, national and international scales. Both Key Stage Three and Four, enables students to make more sense of the world in which they live and encourages them to hold informed views on rapidly changing world issues.

### Key Stage 3 Outline

YEAR 7	YEAR 8	YEAR 9
