

SCIENCE

Key Stage 3

We build and assess your students' KS3 Science knowledge, understanding and skills through dynamic learning techniques and rigorous assessment, ensuring a solid foundation for GCSE and further science study.

in Science, students develop understanding of key facts and concepts with up-to-date content on over 20 topics; and carefully designed questions and activities to encourage students to measure their own progress.

We test students' scientific knowledge at the end of every topic, and we assess their scientific skills at the end of every half term.
